

## WELCOME!

Message from the General Chair:

It is my distinguished pleasure to welcome all the participants to Budapest and the 43rd Annual IEEE/IFIP International Conference on Dependable Systems and Networks. The Annual IEEE/IFIP International Conference on Dependable Systems and Networks (DSN) is the most prestigious international forum for presenting research results in the field of dependability and security. It is especially important for us that this conference is organized in our region for the first time in its history.

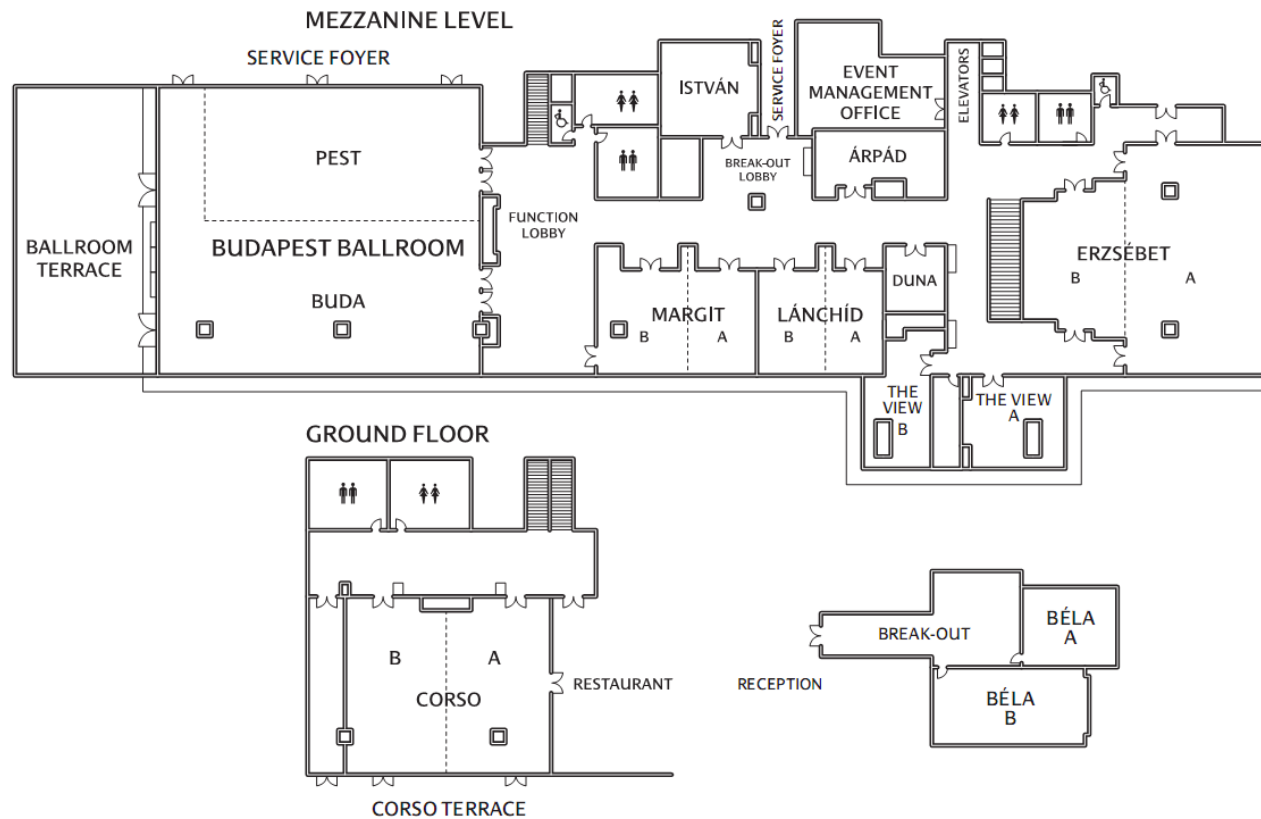

DSN is now in its fifth decade of evolution and has a sustained tradition to address both conceptual and applied research results related to actual questions posed by the rapid IT evolution. This flagship dependability conference addresses the entire spectrum of scientific and technological challenges raised by modern information technologies.

Our program consists of three interesting plenary talks, which address how to reflect the complexity of problems addressed by the dependability community. One of them focuses on novel technology driven challenges, a second one presents a vision on the new approaches to large scale infrastructures, while the third one presents state-of-the-art results from the field of mathematics. The rich program starts with 4 workshops presenting of 45 papers to cover interesting aspects of dependability complemented with 3 tutorials. The state-of-the-art in research is well-represented by 46 regular papers, 12 fast abstracts, 6 student forum papers.

Such a conference relies on the experience and contribution of many members of our community. My special thanks to all of the organizers of the conference for their involvement and continuous help, especially, the past and recent DSN Steering Committee Chairs and Co-Chairs Neeraj Suri, Roberto Baldoni, Rick Schlichting and Paulo Verissimo; Program Committee Chairs George Candea and Peter Kemper; Finance Chair István Alföldi; Registration Chair Dóra Kiszelné Jancsó; Local Arrangements Chair Gábor Huszerl assisted by Nikol Biró; Publications Chair Gábor Horváth; Fast Abstracts Co-Chairs Bojan Cukic and Roy Friedman; BoF Chair Christian Constantinescu; Workshop Co-Chairs Abdelmajid Khelil and Cristina Nita-Rotaru; Tutorial Co-Chairs Alan Wood and Robert S. Swarz; Student Co-Chairs Elias Duarte, Martin Hiller and Dong Seong Kim; Publicity Co-Chairs Ann Tai, Tadashi Dohi and István Majzik. Special thanks to the senior members of our community like Robert Swarz and Chuck Weinstock and to all the other volunteers who helped our work.

András Pataricza, Budapest University of Technology and Economics  
June 2013

### Information about the DSN Conference **locations**:

The **Conference Sessions** will be held in the conference rooms of the Budapest Marriott Hotel (Apáczai Csere János u. 4., Budapest).

We invite you to the Club Restaurant of the Hungarian Academy of Sciences (Széchenyi István tér 9., Budapest, or on older maps you can still find it as Roosevelt tér 9., Budapest) for the **DSN 2013 Welcome Reception** on Monday the 24th June 18:30-20:00. It is a 10 minutes walk from the conference hotel along the Danube river northward.

The **Conference Excursion and Banquet** will be held on Wednesday the 26th June, just after the afternoon session. We will have a bus shuttle to Gödöllő (visiting the Royal Castle of Gödöllő) and to Domonyvölgy (horse show and dinner). The buses have to leave on time to reach the Castle on time. These places are 30-40 km from Budapest, please join the bus shuttle. We will return to the conference hotel about 10 PM.

14:30 – 15:30

Student Papers: **Hardware Dependability**  
(Chair: Yair Amir)

PDS: **Internet security**  
(Chair: Robin Berthier)

Improving the Dependability of FPGA-based real-time embedded systems with Partial Dynamic Reconfiguration  
*J. L. Nunes*

Locality Matters: Reducing Internet Traffic Graphs Using Location Analysis  
*A. Berger, S. Rührup, W. Gansterer, O. Jung*

Detecting and Tolerating Data Corruptions Due to Device Driver Defects  
*F. Fucci*

Evasive Bots Masquerading as Human Beings on the Web  
*J. Jin, J. Offutt, N. Zheng, F. Mao, A. Koehl, H. Wang*

IOCheck: A Framework to Enhance the Security of I/O Devices at Runtime  
*F. Zhang*

15:30 – 16:30

**Technical Committee Meeting (Open to All)**
